

Bat IgG Heavy and Light Chain Antibody

Goat Polyclonal Conjugate HRP

Antigen Affinity Purified

Catalog No. A140-118P

Lot No. 23

APPLICATIONS	WB, IHC, ICC, ELISA
SPECIES REACTIVITY	Bat
AMOUNT	1 mg. Reconstitute with 1 ml of di-H ₂ O. Antibody concentration is 1.0 mg/ml.
CONCENTRATION	1 mg/ml
STORAGE/SHELF LIFE	2 – 8°C / 1 year from date of receipt
PHYSICAL STATE	Lyophilized
BUFFER	Phosphate Buffered Saline (PBS) containing 0.2% BSA and 0.05% Pro-Clean 400
ISOTYPE	IgG
ORIGIN	USA
PRODUCTION PROCEDURES	The antibody was isolated by affinity chromatography using antigen coupled to agarose beads and conjugated to horseradish peroxidase (HRP).

Antibody concentration was determined by extinction coefficient prior to conjugation: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG. Molar enzyme/antibody protein ratio is 4:1.

By immunoelectrophoresis and ELISA this antibody reacts specifically with Bat IgG and with light chains common to other Bat immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. Antibody has been shown to react with bat genus species *Pteropus vampirus*, *Desmodus rotundus*, *Eptesicus fuscus*, *Tadrida pumila*, *T. condylura*, *Hypsignathus monstrosus*, *Rosettus aegyptiacus*, *Epomorphus crypturus*, *Molossus* species, and *Phyllostomus* species.

This antibody may cross react with IgG from other species.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	1:5,000 – 1:50,000
Immunohistochemistry	1:200 – 1:5,000
Immunocytochemistry	1:200 – 1:5,000
ELISA	1:10,000 – 1:100,000

APPLICATION NOTES Not all listed applications have been specifically tested by our laboratory.
