Human IgA Antibody

Rabbit Polyclonal Conjugate HRP

Antigen Affinity Purified Catalog No. A80-103P

Lot No. 11

CONCENTRATION

APPLICATIONS WB, IHC, ICC, ELISA

SPECIES REACTIVITY Human **AMOUNT** 1 ml

1 mg/ml STORAGE/SHELF LIFE 2 - 8°C / 1 year from date of receipt

Liquid PHYSICAL STATE

Phosphate Buffered Saline (PBS) containing 0.2% BSA and 0.05% Pro-Clean 400 **BUFFER**

ISOTYPE IgG USA **ORIGIN**

Antiserum was solid phase adsorbed to ensure class specificity. The antibody was isolated **PRODUCTION PROCEDURES** by affinity chromatography using antigen coupled to agarose beads and conjugated to

horseradish peroxidase (HRP).

Antibody concentration was determined by extinction coefficient prior to conjugation: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG. Molar enzyme/antibody protein ratio is

4:1.

By immunoelectrophoresis and ELISA this antibody reacts specifically with human IgA. Cross reactivity with IgG, IgM and light chains is less than 1%. This antibody may cross

react with IgA from other species.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.

1:2,000 - 1:20,000 Western Blot Immunohistochemistry 1:200 - 1:2,000 Immunocytochemistry 1:200 - 1:2,000 **ELISA** 1:10,000 - 1:100,000

APPLICATION NOTES Not all listed applications have been specifically tested by our laboratory.
