## Mouse IgM Cross-Adsorbed Antibody

Conjugate

DyLight<sup>®</sup> 755

Goat Polyclonal Antigen Affinity Purified Catalog No. A90-201D7 Lot No. 6

APPLICATIONS IHC, ICC, Flow Cyt, IF SPECIES REACTIVITY Mouse. Minimum reactivity to human and rat AMOUNT 1 mlCONCENTRATION 0.5 mg/mlSTORAGE/SHELF LIFE 2 - 8°C / 1 year from date of receipt PHYSICAL STATE Liquid Phosphate Buffered Saline (PBS) containing 0.2% BSA and 0.09% Sodium Azide BUFFER FLUOROPHORE/PROTEIN 5.1 **ISOTYPE** IqG USA ORIGIN PRODUCTION Antiserum was solid phase adsorbed to ensure class specificity. Antiserum was cross PROCEDURES adsorbed using human and rat immunosorbents to remove cross reactive antibodies. The antibody to mouse IqM was isolated by affinity chromatography using antigen coupled to agarose beads and conjugated to DyLight<sup>®</sup> 755. Immunoglobulin concentration was determined using Beer's Law where 1mg/mL IgG has an A280 of 1.4. By immunoelectrophoresis and ELISA this antibody reacts specifically with mouse IqM. Cross reactivity with IgA and IgG is negligible. No antibody was detected against nonimmunoglobulin serum proteins. Less than 1% cross reactivity to human and rat IgM was detected. This antibody may cross react with IgM from other species. APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use. Immunohistochemistry 1:50 - 1:500 Immunocytochemistry 1:50 - 1:500 Flow Cytometry 1:50 - 1:200 Immunofluorescence 1:50 - 1:500 **APPLICATION NOTES** Not all listed applications have been specifically tested by our laboratory. DyLight<sup>®</sup> 755 is excited at 754 (in PBS) and emits at 776 (in PBS). DyLight<sup>®</sup> is a trademark of Thermo Fisher Scientific Inc. and its subsidiaries. **ADDITIONAL INFO** https://www.fortislife.com/p/A90-201D7 Use the link above to view SDS, a current list of citations, and other product specific information.
